Finance and accounting services for start-ups involves carefully chosen customized solutions and services that help the entrepreneurs to understand the alignment of business plan with the organization performance and financial projections. The complete finance and accounting services generate insights that involves accurate reporting and analytics point the health and road map of the company.

The setting up of books of accounts

It is important for an entrepreneur to focus on his business other than fire fighting and setting up the accounting department of a start-up. Also, Setting up the right accounting department with the right people is the key for any start-up. The right accounting team should be capable enough do consulting and give timely advice on the strategies and alignment with the business plan set by the company. We ease the start-up complexities and enable you to focus on your business and we handle all the complexities from our end.

We use the best accounting platform that suits your requirement preferably cloud based accounting system. We also support the accounting system that is being hosted at your premise by accessing them securely remotely from our premise. Our solutions includes Setting up of book of accounts, generating reports that enables tax compliance , Generating accurate financial reports and Analytical reports that help to drive the business smoothly by increasing profitability.

Set-Up

Choosing the right application that would support the start-up ecosystem is the key. Once we understand your business, we help to choose the best and cost effective systems available globally and set up the books of accounts for you. Since we work at remote locations, we also integrate the secure file sharing systems for sharing the files, bills and invoices. The set-up process concludes with sharing of the email accounts for the remote team and all the accessibility credentials.
